Storage unit	
Unità di vendita	Cadauno
Confezione	1
Imballaggio	1
Peso (kg)	5
Volume (cm ³)	42439

Revolutionary PTZ Auto Framing technology powered by built-in AI analytics ensures high quality composed shots without operator.

A Camera that Automatically and Naturally Shoots Video for you With the advanced PTZ Auto Framing feature, the camera automatically track the target in a comfortable viewing with smooth Pan-Tilt-Zoom movement regardless of posture, movement and what one is wearing. Since the camera does most of the work automatically, the operator can spend its time efficiently.

PTZ Auto Framing with built-in AI analytics This camera harnesses powerful AI-powered video analytics that can automatically detect and track the position of a presenter within the camera

frame. As the presenter moves, the camera s pan/tilt/zoom mechanism ensures that the presenter is always framed naturally, without the need for a human camera operator to manually follow their movements.

Automatically and reliably shoots video for youWith Sony s newly developed AI analytics algorithm, it detects the subject s skeleton and head position and matches the subject s detail features even when there are several people in the frame. It achieves accurate framing and consistent tracking.
