The 2565 3D Parcel Dimensioner is a handheld device that allows for quick and precise 3D measurements. Its intelligent reading zone detection and smart guiding aimer make it easy to use, it integrates seamlessly with CipherLab mobile solutions to streamline workflow across multiple applications. The 2565 is ideal for logistics, retail, and warehousing, automates the capture and transfer of critical item dimensions in seconds in shipping and general freight applications, reducing costly disputes and damage claims while also preventing billing errors for revenue protection. Industry Use: Logistics Pickup and Drop off Warehouse Retail Manufacturing Measurement Made Easy to Capture Anywhere, Anytime Designed for portability, measuring on the go. The shippers and carriers can easily measure and	

record the length, width, and height of each package and irregular shape item placed on the ground or on the workstation, such as doorstep collection, parcel drop off locations, warehouses, and shipping hub. They can capture a wide range of package sizes, with side measurements ranging from 3.54 inches (10 cm) to 23.6 inches (60 cm), up to 35.4 inches (90 cm) for long, thin shapes.

Real-time and Accurate Dimensioning for Improved Efficiency

Capture dimensions in 1 second significantly faster than a tape measure. Utilizing structured light technology, the 2565 3D Parcel Dimensioner features laser-guided automation for accurate measurements of both cuboid and irregular-shaped items. This enhances trade accuracy, minimizes disputes, and safeguards your revenue. By eliminating manual entry errors and avoiding incorrect shipping charges, the 3D Parcel Dimensioner makes your operations smoother and more reliable.
