

The screenshot shows the Oracle Cloud Infrastructure (OCI) console interface. At the top, there's a navigation bar with the OCI logo and 'Overview' label. Below this, a summary row shows 'Normal' status, '1' IP address, '12' CIDR blocks, '30' NAT gateways, and '300' subnets. The main content area is divided into several sections:

- Overview (Default):** A circular progress indicator showing '100%' completion.
- IPs on Subnet:** A table listing IP addresses and their associated subnets.
- Traffic Distribution:** A donut chart showing traffic distribution across different subnets.
- Traffic Activities:** A line chart showing traffic activities over time.
- DNS Activities:** A line chart showing DNS activities over time.
- Recent Active SAs:** A table listing recently active service accounts.

The interface is clean and modern, with a light blue color scheme. The charts and tables provide a comprehensive overview of the VCN's status and activity.
